

PumpGuard

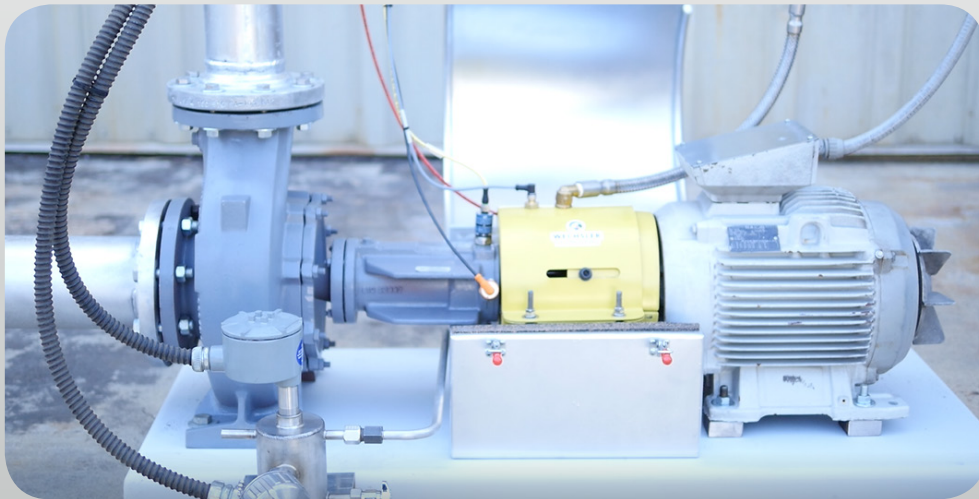

Pump Protection System

Failsafe operation using mechanical fire detection - no reliance on power

Localized foam discharge for maximum suppression effectiveness

Avoid costs, downtime & clean-up caused by full-room foam systems

For pumps handling flammable liquids, the specifically designed PumpGuard System combines preventative monitoring with active fire suppression to rapidly extinguish a potential fire before it has the chance to spread—all in a low-cost, easy-to-install package.

Let's talk about optimizing and protecting your process heating environment.
