SPARE PARTS & RELIABILITY GUIDE

PUMPGUARD SPARES

**KEEP YOUR PUMPGUARD
PERFORMING AT ITS BEST**

Trusted Protection for Critical Pumping Systems

The PumpGuard Pump Protection System was designed to help industries protect their pumping equipment through innovative monitoring, reliability, and maintenance solutions. Our systems are designed to detect potential issues early, reduce unplanned downtime, and improve operational efficiency across a wide range of industrial applications.

With a strong focus on quality, performance, and customer support, we provide genuine spare parts and components that meet the highest standards of reliability and compatibility. Every product is engineered to work seamlessly with PumpGuard Systems, ensuring consistent performance and long-term equipment protection.

Available Spare Parts

9L Foam Canister with Foam

9L stainless steel canister of nitrogen-pressurized, fluorine-free foam agent.

Part Number:

WTE 80059122

Total Price

\$1897.00

25' Detection Tubing 6mm (FDT)

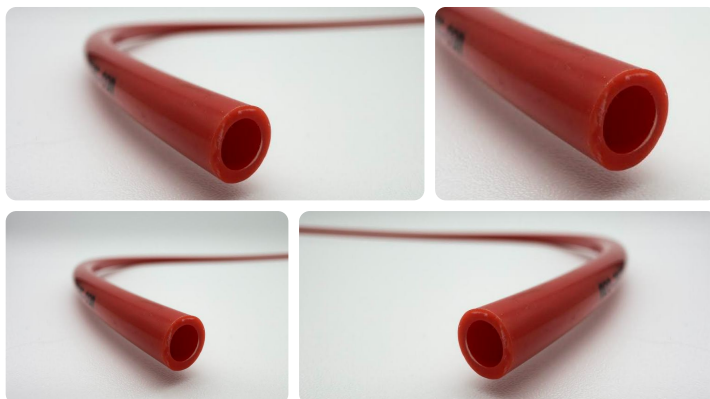

6mm OD red sensor tubing beneath coupling guard, acting as a linear heat/flame detector; causes release of pressurized fire suppression foam upon rupture

Part Number:

8005-FDT025

Total Price

\$321.00

25' Gray Air Tubing

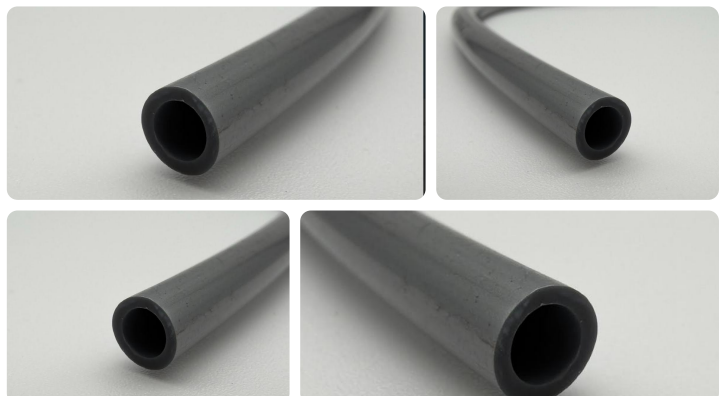

1/4 Inch OD gray sensing line tubing; connects the pressurized air components of the PumpGuard system

Part Number:

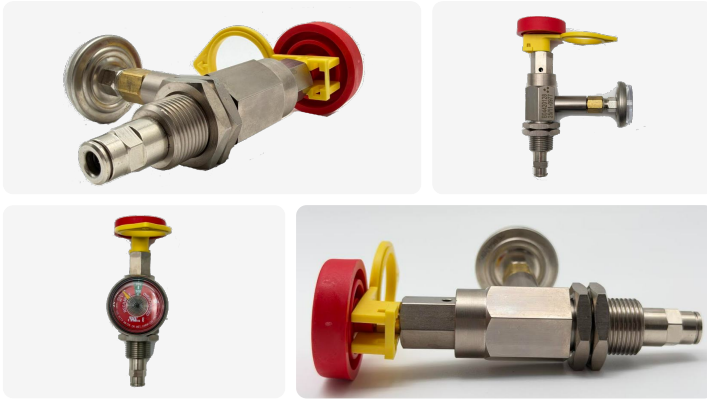

8005-GAT025

Total Price

\$102.00

Available Spare Parts

Manual Release Mechanism with Pressure Indicator

Remote push button for manual foam deployment includes pressure gauge, connection for filling adapter, and fittings to connect red sensor line

Part Number:

8005-MRM02

Total Price

\$285.00

Pressure Switch, Detection Line

Delivers a discrete signal to PLC when pressure is released from the pilot sensing line, indicating a pressure leak from the sensing line

Part Number:

8005-PS02

Total Price

\$225.00

Foam Nozzles

Full cone spiral spray nozzle to distribute foam at the fire area and we use this for PumpGuard and PlumpGuard+

Part Number:

8005-NOZ01

Total Price

\$202.00

Temperature Switch

Delivers a discrete signal to the PLC when high temperature is detected, indicating a possible fire, high oil temperature, etc.

Part Number:

8005-TS01

Total Price

\$185.00

www.wechslertech.com

160 Clairemont Ave, Suite 200 Decatur, GA 30030

Available Spare Parts

N2 Charge Device

A device used to inspect, adjust, or refill nitrogen gas pressure in the sensing line

Part Number:

8005-N2CHARGE

Total Price

\$629.00

Replacement Ferrules, 6mm, 10pk

Small, deformable ring used in tubing and piping compression fittings to create a tight pressure seal and prevent the tube from pulling out

Part Number:

8005-FER01

Total Price

\$30.00

Replacement Tube Inserts, 6mm, 10pk

Stiffens the tube end to prevent leaks that could be caused by the tubing wall collapsing under the grip of the ferrule

Part Number:

8005-INS01

Total Price

\$30.00

Thread Sealant, High-Temp Resistant, 0.2 fl oz

Used for locking and sealing tapered threads on metal fittings; prevents loosening due to vibration or shock

Part Number:

8005-SEAL01

Total Price

\$38.00

160 Clairemont Ave, Suite 200 Decatur, GA 30030

Available Spare Parts

6mm End Plug for Detection Tubing (5-Pack)

Plug for the end of the sensing line; maintains sensing line pressure

Part Number:

DC-6M-B

Total Price

\$91.00

6mm Bulkhead Elbow Union

Brass NPT compression fitting between the interior sensing line and the PumpGuard coupling guard

Part Number:

DBL-6M-B

Total Price

\$61.00

1/2" Tube x 1/2" NPT Male Connector

Brass NPT compression fitting on the side wall of the PumpGuard Air Cowling

Part Number:

DMCB8-8N-S

Total Price

\$76.00

6mm Tube X 1/4" NPT Male Elbow, 2pk

Brass NPT compression fitting between the exterior sensing line and the PumpGuard coupling guard

Part Number:

DLM6M-4N-B

Total Price

\$48.00

Available Spare Parts

Temperature Sensor

Delivers RTD input to PLC to indicate an increase in temperature at the bearing seal due to increased friction from misalignment or seal degradation

Part Number:

8005-TS01

Total Price

\$197.00

Vibration Sensor

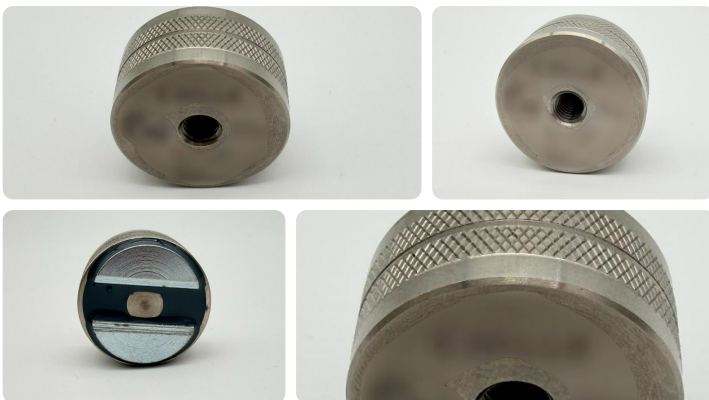

Delivers an analog signal to the PLC to indicate the bearing's vibration for monitoring

Part Number:

8005-VT01

Total Price

\$491.00

Mount Head, Vibration sensor

Magnetic mount for the vibration sensor

Part Number:

8005-VTMOUNT

Total Price

\$265.00

Oil Level Detector, 2pk

Discrete signal to the PLC to indicate that fluid has leaked into the leak detection canister body.

Part Number:

8005-LS01

Total Price

\$100.00

Why Choose Genuine PumpGuard Spare Parts

Genuine PumpGuard spare parts are specifically designed and manufactured to meet the exact specifications of your PumpGuard system. Unlike generic alternatives, OEM components ensure seamless integration, reliable performance, and long-term durability.

Our Customers

At Wechsler Technologies, we believe in the power of partnership. Our trusted network of industry-leading partners helps us deliver innovative and reliable thermal fluid solutions.

Why Keep PumpGuard Spare Parts in Inventory?

Be Prepared Before Downtime Happens

Unexpected equipment failures can lead to costly downtime, production delays, and increased maintenance expenses. Keeping essential PumpGuard spare parts readily available ensures your team can respond quickly when replacements are needed, minimizing disruptions and maintaining operational continuity.

Having critical spares in inventory is a proactive maintenance strategy that helps protect both your equipment and your productivity.

Minimize Downtime

Reduce waiting time for replacement parts and get systems back online faster when maintenance or repairs are required.

Improve Maintenance Efficiency

Enable maintenance teams to perform repairs and scheduled servicing without delays caused by parts procurement.

Protect Critical Operations

Ensure essential monitoring and protection systems remain operational, helping safeguard pumps and associated equipment.

Reduce Emergency Costs

Avoid expensive rush orders, expedited shipping, and unplanned maintenance expenses during critical situations.

Support Preventative Maintenance

Having replacement components on hand allows worn parts to be replaced proactively before failures occur.

Extend Equipment Lifespan

Timely replacement of aging or damaged components helps maintain system performance and prolong the life of your PumpGuard installation.

Increase Operational Reliability

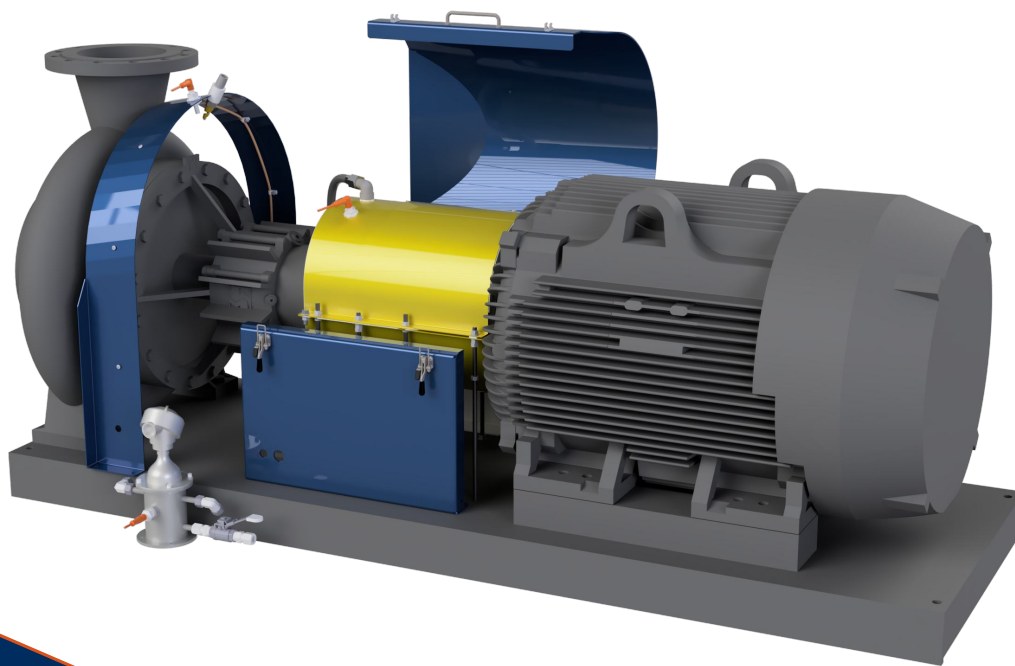

A well-stocked spare parts inventory helps ensure continuous monitoring, protection, and performance of your pumping systems.

Enhance Safety & Compliance

Maintain a reliable inventory of essential spare parts to support safe system operation and help meet maintenance, inspection, and compliance requirements.
